INTDS web surfing Mini Guidelines

To open page which contains 'daughters' (indicated with ▼ or >) the double click is needed. One click on the name of such page shows its submenu

but if you wish to visit the page itself you should use the double click when hovering on the page name in the menu (or you may open it by clicking the icon on the main page):

and here you are

For more please visit Target parameters, Basic methods of target preparation, A bit of history and other pages of this site.
